Professional Summary

I am a dedicated Computer Science Engineering student at **Chennai Institute of Technology** with a passion for Artificial Intelligence, Data Science, and Software Development.

I specialize in taking data-driven concepts and translating them into practical software applications. Having completed the **Data Fundamentals Certification from IBM SkillsBuild**, I possess a strong foundation in data analysis, data visualization, and structured decision-making processes.

Core Technical Focus

- **Data Science & AI:** Data analysis, pattern extraction, IBM Watson integration, and visual analytics.
- **Full-Stack & App Dev:** Web application development, responsive layouts, and database integrations.
- **Agri-Tech Solutions:** Building technology prototypes to solve real-world agricultural challenges.

Engineering Mindset

- **Problem Solving:** Structured approach to dissecting complex challenges into technical tasks.
- **Continuous Learning:** Constantly expanding technical depth in Python, databases, and AI frameworks.
- **Target Roles:** Preparing for software engineering, data science, and remote AI developer opportunities.

What Drives Me

"I believe in continuous learning, consistency, and creating impactful technology solutions that make a tangible difference in everyday life."

Education Timeline

GRADUATION: SEPTEMBER 2025

Chennai Institute of Technology

Bachelor of Engineering (B.E.) — Computer Science Engineering

Focusing on core computer science disciplines including Data Structures, Algorithms, Database Management Systems, Software Engineering, Artificial Intelligence, and Data Analytics.

- Computer Science
- Artificial Intelligence
- Data Structures
- Database Systems
- Software Engineering

HIGHER SECONDARY EDUCATION

VRC HSS School, Tenkasi

12th Grade — Science & Computer Stream

Specialized in Mathematics, Physics, Chemistry, and Computer Science. Built strong quantitative problem-solving skills and initial computer programming foundations.

- Mathematics
- Physics
- Chemistry
- Computer Science

Academic Commitment & Excellence

Combining rigorous academic coursework with hands-on self-learning through industry-recognized certifications like IBM SkillsBuild and practical project implementation.

Skills & Competencies

Organized by core technical domains and verified capabilities

Data Science & Analytics

Data Analysis

Data Visualization

Data-Driven Decision Making

Statistical Fundamentals

AI & Machine Learning

IBM Watson

AI Concepts

Predictive Analytics

Model Evaluation

Programming Languages

Python

C / C++ (Academic)

JavaScript Basics

Web Development

HTML5 / CSS3

Full-Stack Concepts

App Development Basics

Responsive Design

Databases

MongoDB (Certified)

NoSQL Document Stores

SQL Basics

Tools & Platforms

IBM SkillsBuild

Git / GitHub [\[Link\]](#)

VS Code

Jupyter Notebooks

Domain Specializations & Problem Solving

Applied technical interests focused on creating real-world impact:

Agriculture-Based Technology Solutions

Real-World Problem Solving

Innovation & Prototyping

Shenbaga maha devan S — Portfolio

Page 04

Featured Projects (1 / 2)

Real-world applications and technology prototypes

Agriculture-Based Technology Solutions

Agri-Tech & AI

Smart Crop & Resource Optimization System

Problem Statement: Traditional agricultural practices often lack data-driven insights, leading to sub-optimal crop yield predictions and inefficient resource utilization.

Solution & Features: Conceptualized and developed a prototype system leveraging Python data analysis to process agricultural environmental metrics, providing farmers with actionable insights.

- **Data Analysis:** Structured dataset processing for soil, climate, and crop metrics.
- **Visualization:** Clean visual dashboards for intuitive interpretation of trends.
- **Impact:** Demonstrates practical application of technology in sustainable farming.

Python

Data Visualization

Data Analysis

[\[Add GitHub Repo Link\] →](#)

IBM Watson Data Analytics Pipeline

Data Science

Automated Data Insights & Visual Analytics

Overview: Built as part of the IBM SkillsBuild Data Fundamentals program to perform end-to-end data exploration, transformation, and visual reporting.

- Preprocessed raw datasets to extract statistical patterns and key metrics.
- Implemented IBM Watson-assisted visual dashboards for executive summary generation.

IBM Watson

Featured Projects (2 / 2)

Full-stack web applications and software prototypes

Full-Stack Web & App Development Prototype

Full-Stack

Modular Web Portal & NoSQL Database Integration

Problem Statement: Modern applications require seamless synchronization between interactive frontends and flexible, scalable document databases.

Solution & Architecture: Designed a full-stack web application incorporating clean HTML/CSS web interfaces with MongoDB database connectivity for document storage.

- **Frontend:** Responsive interface built with HTML5, CSS3, and modern UI components.
- **Database:** Integrated MongoDB NoSQL backend for structured data operations.
- **My Contribution:** End-to-end architecture, UI layout design, and schema modeling.

HTML5/CSS3

MongoDB

Web Development

Hackathons & Competitions

Demonstrating teamwork, innovation, and rapid prototyping

Smart India Hackathon (SIH) / Innovation Challenge

SHORTLISTED / PARTICIPANT

Domain: Agriculture Technology & AI Solutions (2024–2025)

Participated in national-level innovation challenges to solve key agricultural and technology problem statements under strict time constraints.

- **Role:** Team Lead / Developer & Data Analyst.
- **Project Idea:** Tech-driven solution leveraging data insights for crop optimization.
- **Outcome:** Gained extensive experience in rapid prototyping and solution pitching.

Chennai Institute of Technology Hackathon

PARTICIPANT

Campus Tech & Software Competition (2024)

Engaged in competitive hackathon challenges focusing on full-stack web concepts, problem-solving, and collaborative software engineering.

Future Hackathon Track Record

Actively preparing for upcoming national hackathons, coding contests, and open-source innovation challenges.

Certifications & Courses

Verified industry qualifications and coursework

Data Fundamentals Certification

Verified Credential

IBM SkillsBuild

Comprehensive industry training covering fundamental data principles, analytical workflows, data visualization techniques, and data-driven decision making.

Key Knowledge Areas:

Data Analysis

Data Visualization

IBM Watson Concepts

Data Literacy

MongoDB Basics for Students

Verified Credential

MongoDB University

Foundational course on NoSQL database management, document data modeling, CRUD operations, indexing, and MongoDB Atlas cloud deployment concepts.

Key Knowledge Areas:

NoSQL Databases

Document Modeling

MongoDB Atlas

Querying & Indexing

Additional Learning Badges

Continuously enrolling in advanced coursework across Python for Data Science, Cloud Computing, and Machine Learning.

Academic & Hands-On Experience

Practical engineering & project-based experience

Student Developer & Data Engineering Practitioner

Academic Projects

Chennai Institute of Technology

Key Responsibilities & Highlights:

- Designed and implemented data analytics and visualization workflows using Python data libraries.
- Utilized IBM SkillsBuild framework to model structured datasets and implement data-driven decision-making processes.
- Collaborated on agriculture-based technology solutions, bridging computer science principles with practical sector problems.
- Built and tested full-stack web prototypes connected with MongoDB databases.

Internship Readiness

Actively seeking software engineering, data science, and AI developer internship opportunities to apply analytical and programming capabilities in corporate environments.

[Add Future Internship / Company Experience]

Verified Achievements

Academic accomplishments and technical milestones

IBM SkillsBuild Certification

Data Fundamentals

Earned official certification from IBM SkillsBuild in Data Fundamentals, demonstrating proficiency in data analysis, visualization, and decision-making concepts.

MongoDB University Credential

MongoDB Basics

Successfully completed MongoDB Basics for Students, demonstrating skill in NoSQL database architecture and document querying.

Academic Admission & Standing

Chennai Institute of Technology

Admitted to Bachelor of Engineering (BE) in Computer Science Engineering at Chennai Institute of Technology, maintaining focus on core CS subjects.

Computer Science Foundations

VRC HSS School Tenkasi

Completed Higher Secondary Education with Computer Science, Mathematics, Physics, and Chemistry stream, laying the foundation for engineering studies.

Future Milestones

Targeting research publications, open-source project contributions, and competitive coding milestones.

Current Learning & Interests

Forward-looking goals and targeted career paths

What I Am Currently Learning

Continuously upgrading technical knowledge to stay aligned with modern industry trends:

- **Advanced Python & AI Frameworks:** Expanding from data analysis into machine learning models and predictive analytics.
- **Full-Stack Modern Frameworks:** Strengthening JavaScript, frontend libraries, and backend RESTful APIs.
- **Cloud & Deployment:** Exploring cloud deployment platforms and containerization basics.

Career Target Roles

- Data Analyst / Data Science Intern
- Remote AI & Software Developer
- Full-Stack Web Developer
- Agri-Tech Solutions Developer

Specialization Areas

- Artificial Intelligence & Watson Services
- Data Visualization & BI Dashboards
- Agriculture-Based Tech Systems
- Database Architecture (NoSQL / MongoDB)

Open to Opportunities

Eager to join innovative tech teams, hackathon groups, and software projects where I can contribute my skills in Data Science, AI, and Full-Stack development.
